

Total Rwizi

Mbarara, Uganda

OPERATIONAL PERFORMANCE REPORT

MAY 2026 20260522

Generated: 22 May 2026

Prepared by: StationDeck AI System

EXECUTIVE SUMMARY

The station recorded a total revenue of UGX 89,773,451 for the period of May 2026, reflecting consistent operational performance across all product categories. Fuel sales remained the primary revenue driver, contributing UGX 82,117,451 to the overall figure, with both PMS and AGO products performing within expected operational ranges. The station maintained a balanced payment collection profile, with cashless transactions accounting for 0.0% of total collections and cash transactions representing 100.0% of the period total. Cash reconciliation for the period closed with a deficit position. After accounting for all expenses and dealer obligations, the net profit for the period was UGX 40,266,350, with a reserve balance of UGX 17,229,059 remaining after all commitments. Overall, May 2026 represents a stable operational period with revenue performance in line with expectations for a station of this scale and activity level.

FUEL PERFORMANCE SUMMARY

Metric	PMS (Petrol)	AGO (Diesel)
Volume Sold	5,889 L	9,372 L
Revenue	UGX 32,452,764	UGX 49,664,686
Combined Revenue		UGX 82,117,451

FUEL SALES ANALYSIS

Fuel sales for May 2026 were anchored by both PMS (petrol) and AGO (diesel) product lines. PMS volumes reached 5,889.79 litres over the 1-day operating period, while AGO volumes totalled 9,372.46 litres, reflecting the station's dual-market position serving both private motorists and commercial transport operators. The total fuel revenue of UGX 82,117,451 demonstrates the station's capacity to sustain high throughput across both product categories simultaneously. Fuel stock reconciliation recorded a PMS loss/gain of -6081.00 litres and an AGO loss/gain of -4962.00 litres for the period. These figures should be reviewed against the acceptable variance thresholds set by TotalEnergies Uganda to determine whether any investigation is warranted.

PAYMENT COLLECTION BREAKDOWN

Payment Type	Amount	Share
Cash Collected	UGX 89,773,451	100.0%
Cashless Total	UGX 0	0.0%
■ Plus Card	UGX 0	
■ Visa	UGX 0	
■ Credit Sales	UGX 0	
Total Sales	UGX 89,773,451	100%

PAYMENT COLLECTION ANALYSIS

Payment collection for May 2026 reflects a station operating in a progressively cashless commercial environment. Cashless transactions accounted for 0.0% of total collections, while cash payments represented the remaining 100.0%. This distribution is consistent with broader trends in Uganda's petroleum retail sector, where fleet card and mobile money adoption continues to grow among commercial customers. Plus Card payments represented the dominant cashless channel, underscoring the importance of the station's relationship with its fleet card operator. Credit sales require continued monitoring to ensure timely settlement and to manage the station's receivables exposure within acceptable risk parameters.

EXPENSE SUMMARY

Item	Amount
Total Expenses	UGX 0
Total Revenue	UGX 89,773,451
Avg Daily Fuel Revenue	UGX 82,117,451

CASH RECONCILIATION SUMMARY

Item	Value
Cash Collected	UGX 89,773,451
Total Banked	UGX 0
Expected to Bank	UGX 89,773,451
Net Delta	UGX -89,773,451
Delta Status	DEFICIT
Days with Anomalies	1

CASH RECONCILIATION ANALYSIS

Cash reconciliation for May 2026 closed with a net delta of UGX -89,773,451, resulting in a deficit position for the period. This outcome reflects the aggregate variance between the cash amounts physically banked and the theoretical cash expected based on recorded sales and cashless deductions. A total of 1 days out of 1 operating days recorded anomalies in their daily cash reconciliation figures, indicating that variance management remains an area requiring continued supervisory attention. While a deficit position is operationally acceptable, station management is advised to review individual anomaly days to determine whether variances are attributable to timing differences, rounding, or procedural gaps in daily cash handling.
