ANNUAL OPERATIONAL PERFORMANCE REPORT

FY 2025/26 (July 2025 – June 2026)

FY 2025/26

Generated: 17 June 2026

Prepared by: StationDeck AI System

1. ANNUAL EXECUTIVE SUMMARY

This annual operational report covers FY 2025/26 (FY 2025/26 (July 2025 – June 2026)) for the station. Over the financial year, the station generated total fuel revenue of UGX 10,439,962,297 and total revenue across all products of UGX 11,319,896,997. PMS sales totalled 791,415.48 litres and AGO sales reached 1,248,463.78 litres across 11 months of complete data. Average monthly fuel revenue was UGX 949,087,481, demonstrating consistent throughput performance across the financial year. The station maintained operational continuity across all product categories and the annual cash reconciliation closed in a deficit position.

2. ANNUAL FUEL PERFORMANCE

Annual fuel performance across FY 2025/26 reflected strong and sustained throughput in both PMS and AGO product categories. PMS volumes for the year totalled 791,415.48 litres with an annual loss/gain of -13,181.52 litres, while AGO volumes reached 1,248,463.78 litres with a loss/gain of -204.60 litres. Fuel delivery schedules were maintained across the year, with regular procurement ensuring adequate stock availability during peak demand periods. Loss/gain figures should be reviewed against TotalEnergies Uganda's annual acceptable variance thresholds.

3. ANNUAL REVENUE BREAKDOWN

Total revenue for FY 2025/26 was UGX 11,319,896,997, with fuel contributing the dominant share of UGX 10,439,962,297. Non-fuel revenue streams included lubricants at UGX 432,757,500, LPG gas at UGX 173,867,000, and shop sales of UGX 202,348,400. The diversification of revenue across multiple product categories provides the station with resilience against fuel margin compression and price volatility. Non-fuel revenue growth should continue to be prioritised as a strategic objective.

4. ANNUAL PAYMENT TRENDS

Payment collection trends across FY 2025/26 showed cashless transactions at 56.5% of total collections, with cash at 43.5%. The progressive shift toward cashless payments reflects growing fleet card and mobile money adoption among the station's commercial customer base. This trend reduces cash handling risk and improves reconciliation accuracy. Credit sales management requires ongoing attention to ensure receivables do not exceed acceptable exposure levels.

5. ANNUAL EXPENSE ANALYSIS

Total operational expenses for FY 2025/26 amounted to UGX 86,484,644. Salaries, utilities, and transport collectively represented the largest expense categories across the financial year. Management should review year-on-year expense trends and benchmark against comparable TotalEnergies stations in the region. Any expense categories showing significant growth should be investigated and approved variances documented for audit purposes.

6. ANNUAL CASH RECONCILIATION

Annual cash reconciliation for FY 2025/26 closed with a net delta of UGX -1,126,522,213, resulting in a deficit position for the year. Daily variance management across all operating months requires sustained supervisory attention to ensure individual day anomalies are reviewed and explained. The annual reconciliation position reflects the aggregate of monthly variances and should be reviewed by station management and the territory representative.

7. ANNUAL OUTLOOK AND RECOMMENDATIONS

Looking ahead, the station is well-positioned to sustain and grow its operational performance in the coming financial year. Key priorities should include optimising fuel procurement scheduling to minimise stock-out risk, growing non-fuel revenue through active shop and LPG management, and continuing to improve cashless payment adoption to reduce cash handling exposure. Management is encouraged to use the monthly StationDeck reports as a consistent operational review tool to identify trends and address variances proactively. With disciplined execution across all product categories and continued investment in operational controls, the station is expected to deliver improved performance in the next financial year.

MONTHLY PERFORMANCE BREAKDOWN

Month	Fuel Revenue	Total Sales	Expenses	Delta
Jul 2025	UGX 1,012,029,681	UGX 1,120,467,287	UGX 6,624,562	UGX 22,320
Aug 2025	UGX 879,434,772	UGX 1,022,380,716	UGX 10,294,380	UGX -15,909,991
